

DIRECTOR BIOS

Jay Abbott, Director, Pacific Association USATF Foundation

I joined the Pacific Association USATF Foundation because I was impressed to see the Foundation's plan to grow and address more needs in our track and field region. Being part of the Foundation would enable me to better understand and contribute to a wide variety of PAUSATF activities.

During my professional career, I managed energy and infrastructure programs that were co-sponsored by public and private entities. The success of these efforts depended upon the credibility and the demonstrated progress of my team. I am comfortable with the continuous scrutiny of an organization that I represent, with outreach to stakeholders, and producing communications intended to inspire cooperation and, at the same time, to control expectations. I served for one two - year term as secretary of the officials' executive committee and I could fill that role for the Foundation if needed.

With my retirement in January 2013, I have been able to focus my volunteer activities on my church, the Sacramento Regional Conservation Corps, the American River Parkway Advisory Commission, and track and field officiating. Providing time for the Pacific Association USATF Foundation will fit nicely in the time I have available to serve athletes, coaches, officials, and the general track and field/LDR community. The following are activities with which I have been involved.

My position title was that of: Resource Economist, Energy and Environmental Manager

SPECIALTIES AND INTERESTS:

Open Space and Recreation Planning Natural Resources and Sustainability Energy Transmission; Electricity and Natural Gas
Renewable Energy and Conventional Generation
NEPA/CEQA and Permitting
Stakeholder Engagement

I retired from Black & Veatch in Jan 2013 with forty years of experience on energy, water, and other infrastructure projects. Leader of industry and government teams on major project assignments.

Manager of the following types of projects:

- o Renewable energy planning and implementation
- o High voltage electric power transmission line approvals
- o Natural gas, crude oil, and products pipeline approvals
- o Hydropower and pumped storage investigations
- o Regulatory restructuring initiatives
- o Construction monitoring and environmental compliance
- o Disaster recovery

With Black & Veatch, I served as Project Manager for:

- o California Energy Commission, Renewables Strategic Plan, Cost Reduction and Investment/Finance elements
- o European Bank for Reconstruction and Development, Ukraine Sustainable Energy Lending Facility, Strategic Environmental Review
- o US Army Corps of Engineers, Solar Power Feasibility Study, Yuma Proving Ground
- o Sacramento Municipal Utility District, Owner's Engineer, 125 MW Solano Wind Project Phase 3 EPC

o Southern California Edison, Transmission Project Licensing, Process improvement and project scheduling

Earlier in career, some of my highlights were:

- o FERC Office of Energy Projects, NEPA process for ten interstate gas pipelines, including first 3rd party EIS and first EIS under pre-filing consultation process
- o California-Oregon Transmission Project (COTP, 500 kV, 1,600 MW), Assistant Project Director, responsible for NEPA/CEQA, permitting, and land acquisition
- o Alaska Natural Gas Transportation System, Manager of Environmental Affairs, and Trans-Alaska Pipeline System, Environmental Coordinator for Alyeska

COMMUNITY ACTIVITIES:

- Chair, Sacramento County Open Space Commission, 1988 – 1991

EDUCATION:

- University of California, Davis, Master of Science, Resource Economics
- Johns Hopkins University, Bachelor of Arts, Social and Behavioral Science
